Easy Inventory is a complete automation software for any inventory dealing organization. It is unparalleled and comprehensive, that covers each and every entity of any organization. The uniqueness of this software allows it to be used with several types of inventories Shops, Electronically. Mechanical, Clothing and Medical.

Project Name: FIXED ASSET

Client: Manappuram Foundation

Role: GUI Designing, Coding, Reports and Error Handling.

Environment: VS2010, PLSQL (Oracle)

Fixed asset management is the process of tracking and maintaining an organization's physical assets and equipment. Asset types include vehicles, computers, furniture and machinery.

Using an asset management system, organizations can:

- Track and monitor fixed assets
- Oversee equipment and machinery in multiple locations
- Lower maintenance costs
- Improve operational efficiency
- Maintain a record of retired, sold, stolen or lost assets

Fixed asset management enables organizations to monitor equipment and vehicles, assess their condition, and keep them in good working order. In this way, they minimize lost inventory, equipment failures and downtime and improve an asset's lifetime value.
